

FREE AWS Cloud Risk Assessment by Rapid7

Gain an understanding of your AWS security posture with a comprehensive cloud risk assessment at no charge

Rapid7's AWS Cloud Risk Assessment is a comprehensive advisory service that helps security teams analyze their AWS environment, uncover risks, and get the insights needed to eliminate those risks. This service is designed to provide you with a point-in-time understanding of your entire AWS cloud footprint and its security posture using a combination of market-leading technology and hands-on expertise.

The service will deliver actionable prioritization and remediation steps to help you reduce risk, as well as highlighting cost optimization opportunities for your organization's cloud infrastructure. During the no-cost assessment, our experts will inspect your cloud environment for more than 100 distinct risks and misconfigurations, including publicly exposed resources, lack of encryption, and user accounts not utilizing multi-factor authentication.

At the end of this assessment, your team will receive an executive-level report aligned to the [AWS Foundational Security Best Practices](#), participate in a read-out call, and discuss next steps for executing your risk mitigation program alongside cloud security experts from Rapid7 and our services partners.

Gain Visibility Into Your AWS Environment and Surface Risks

Get visibility into your AWS footprint and your overall cloud security posture with critical risks clearly identified.

Receive Guidance on How to Address Risk Found in Your Environment

Get visibility into your AWS footprint and your overall cloud security posture with critical risks clearly identified.

Align to AWS Foundational Security Best Practices

Assess your entire AWS environment for compliance against AWS Foundational Security Best Practices and identify areas for security and cost optimization.

See the Value of Cloud Security (Without a POC)

Understand the ROI that Rapid7's cloud security products can offer without the need to go through a time-intensive POC process.
