# Endpoint management with Microsoft and CYBER1 Solutions

CYBER1 Solutions offer a unified approach to managing security risks and adapting to evolving work habits by optimizing endpoint management, reducing total cost of ownership, and ensuring users remain securely connected and productive.

### Reduce Attack Surfaces
Integrates with various services to enforce consistent security policies, reducing potential vulnerabilities.

### Mitigate Vulnerabilities
Ensures device compliance and automates app and OS patching to address security vulnerabilities.

### Enable Approved Elevation of Privileges
Allows temporary elevation of user privileges for specific tasks, minimizing risks associated with permanent admin rights.

### Protect Data & Privacy for BYO Devices
Mobile application management without device enrollment, safeguarding corporate data on personal devices while respecting user privacy

**75%** of organizations are pursuing security vendor consolidation in 2022, up from 29% in 2020.

**10%** Reduced risk of a security breach.

**10HRS** average time saved in organisations per user per year from improved device performance and reduced outages.

## DO MORE WITH LESS

Simplification          Strengthen Security          Savings

# Endpoint Management Workshop

Get a custom assessment of your endpoint security posture and discover strategies to enhance your organisation's device management capabilities.

## WHAT TO EXPECT

During this workshop, we'll partner with you to strengthen your organisation's approach to endpoint management while helping you to fortify your endpoint security with advanced protection and compliance controls.

- Gain actionable insights of your device ecosystem and identify potential security risks.

- Discover the powerful features and benefits of Microsoft Intune for unified endpoint management.

- Learn how to prioritize and remediate vulnerabilities across all managed devices.

- Develop a customized implementation plan based on your organisation's specific needs and objectives.

- Understand best practices for reducing the attack surface through effective device and application management.

## ENDPOINT MANAGEMENT SERVICES

- ✓ Intune Implementation & Management
- ✓ Endpoint Security & Protection
- ✓ Device Compliance & Management
- ✓ Endpoint Lifecycle Management
- ✓ Mobile Device Management
- ✓ Security Baseline Implementation

## READY TO LEARN MORE?

Contact us today to schedule an Endpoint Management Workshop and see how CYBER1 Solutions can help you enhance your device management capabilities.
