

Identity & Access Management with Microsoft & CYBER1 Solutions

Enhance the security of your users, applications, workloads and devices with identity and access management, while streamlining access through single sign-on. Partner with CYBER1 Solutions and Microsoft to achieve your hybrid identity goals and fully leverage the advanced capabilities of Microsoft Entra.

Single Sign-on

Implement SSO for seamless access to multiple cloud apps with one set of credentials.

Multifactor Authentication

Enhance security by requiring multiple identity verification methods across all access points to prevent unauthorized access.

Secure Cloud Resources

Enable secure access to cloud resources from any location to support hybrid work environments.

Automate Provision

Automate user provisioning and enable self-service password reset.

DO MORE WITH LESS

Implement Secure Access Controls

Reduce Risk with Conditional Access

Enhance Efficiency with Automation

Identity & Access Management Workshop

Get a customized analysis of your hybrid identity environment and learn how to seamlessly integrate identity management with advanced security features like SSO, MFA, and CA.

WHAT TO EXPECT

During this workshop, we'll partner with you to strengthen your organization's approach to hybrid identity security while helping you better understand how to prioritize and mitigate potential attacks.

Gain identity security to support remote workers and hybrid work environments.

Secure access to private apps and networks while protecting users from web threats through traffic control.

Replace multiple credentials with single sign on to internal and external resources, like cloud apps and servers.

Optimise conditional access policies to grant users the appropriate access levels.

Enable self-service password reset and simplify access to apps from almost anywhere.
