CYBER1 Solutions

Microsoft Security

Manage Risk & Privacy with Microsoft & CYBER1 Solutions

Privacy is a growing concern for both organisations and consumers, with increasing attention on how personal data is handled. As regulatory requirements evolve and data protection requirements become more complex, managing sensitive information can be challenging. CYBER1 Solutions, in partnership with Microsoft, offers comprehensive support to enable your organisation to meet privacy compliance objectives, mitigate risks, and safeguard sensitive data effectively.

Proactive Privacy Risk Identification

Automatically discover and monitor sensitive data, while continuously identifying overexposure and potential privacy risks.

Streamlined Compliance & Governance

Automate privacy policy enforcement and data subject request management, simplifying compliance with regulations.
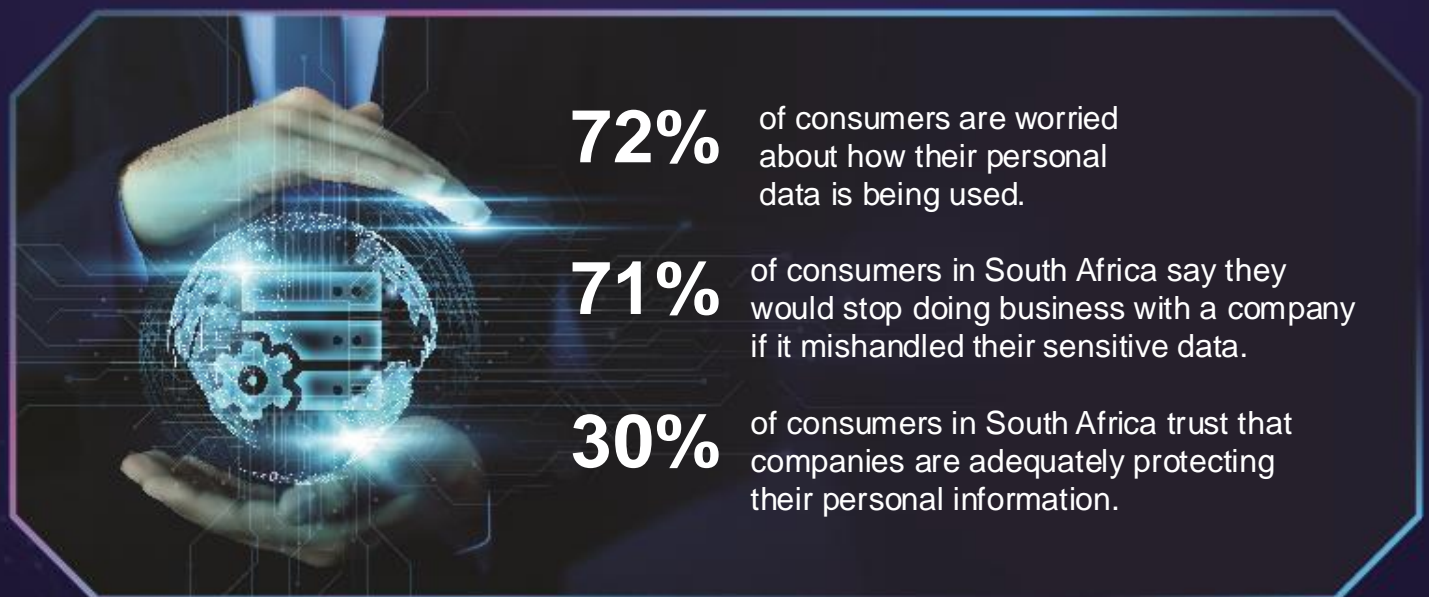

Integrated Insights & Recommendations

Receive actionable insights and intelligent recommendations to quickly mitigate privacy risks.

Customisable Privacy Policies

Create and enforce customised privacy policies across all environments, ensuring consistent data protection practices.

72% of consumers are worried about how their personal data is being used.

71% of consumers in South Africa say they would stop doing business with a company if it mishandled their sensitive data.

30% of consumers in South Africa trust that companies are adequately protecting their personal information.

DO MORE WITH LESS

Automated Privacy Risk Detection

Comprehensive Data Visibility

Reduced Operational Cost

Privacy Risk Workshop

Receive a custom privacy risk assessment explore ways to enhance your privacy management, ensuring better alignment with regulatory requirements.

WHAT TO EXPECT

During this workshop, we'll work with you to improve your privacy management and help you prioritise and mitigate key risks.

Discover potential privacy risks and vulnerabilities in how your organisation collects, stores, and processes personal data.

Discover effective methods to address identified privacy risks, such as data minimisation, encryption, and access control measures.

Gain insights into how to ensure alignment with privacy regulations like GDPR and POPIA minimising regulatory risks.

Gain insights into the benefits of using Microsoft Priva and other privacy management tools to safeguard personal data and ensure compliance.

Build a custom action plan based on your organisation's specific privacy needs and compliance objectives.
