

# Zero Trust with Microsoft & CYBER1 Solutions

Organisations need a security model that adapts to modern complexities, supports the hybrid workplace, and protects users, devices, apps, and data. With CYBER1 Solutions and Microsoft, you can achieve your security goals while boosting resilience and safeguarding critical assets.

## Modernize Security Posture

Implement a strategy to counter evolving threats and ensure robust protection.

## Secure Remote & Hybrid Work

Use Zero Trust to continuously verify identities and devices, regardless of location.

## Protect Sensitive Data

Identify sensitive data, know its location, and protect it from unauthorized access.

## Reduce Breach Damage

Use advanced detection and response strategies to minimize breach impact and protect operations.

## DO MORE WITH LESS

Reduced Attack Surface

Efficient Access Management

Automated Threat Detection

# Zero Trust Workshop

Get a custom assessment of your Zero Trust security posture and learn how to enhance your approach to continuous verification and access control.

## WHAT TO EXPECT

During this workshop, we'll partner with you to enhance your organisation's Zero Trust security strategy, helping you prioritize and mitigate potential threats through continuous verification and access control.

Uncover potential security gaps across your digital estate.

Learn how to implement identity-based controls to protect users, devices, and data.

Understand strategies to minimize risks by continuously validating trust for every access request.

Explore the benefits and capabilities of Zero Trust architecture, including least-privilege access and network segmentation.

Assess security posture continuously to adapt to emerging threats.

## ZERO TRUST SERVICES

- ✓ Zero Trust Architecture Optimisation
- ✓ Zero Trust Network Access
- ✓ Zero Trust Compliance Frameworks
- ✓ Application Threat Modelling
- ✓ Risk-Based Security Posture Management

## READY TO LEARN MORE?

Contact us today to schedule a Zero Trust Workshop and see how CYBER1 Solutions can help you improve your security by continuously verifying and restricting access based on least privilege.
